

WATER SOFTENER COMPARISON

TwinTec COBALT v Kinetico

Dimensions	Harvey	Kinetico
Height	487mm	498mm
Depth	438mm	468mm
Width	202mm	219mm

Specification	COBALT	HE	HF
Made from 62% recycled plastic	YES	No	No
Water efficiency*	3.4%	3.95%	4.34%
Salt efficiency**	50%	38%	35%
Soft water capacity	500 ltrs	430 ltrs	392 ltrs
Bathrooms	1 - 3	1 - 3	1 - 3
Peak flow rate	56 l/m	41 l/m	51 l/m
Regeneration time	11 mins	11 mins	11 mins
Regeneration volume	17 ltrs	20.5 ltrs	20.5 ltrs
Salt used per regen	300g	340g	340g
Duplex parallel flow	YES	No	No
Min meter performance	0.05 l/m	0.25 l/m	1 l/m
Min operating pressure	1 bar	1.8 bar	1.8 bar
Max hardness	635 ppm	507 ppm	474 ppm
Adjustable brine valve	YES	No	No
Max operating pressure	10 bar	6 bar	6 bar
Tested beyond British standard of 5000	YES	No	No
Easy to handle, light mini curve salt	YES	No	No

TwinTec COBALT

The NEW TwinTec Cobalt, the first eco-friendly water softener is made from 65% recycled plastic. Tested beyond British standards to over 1million cycles, giving you the confidence it's the most reliable water softener.

Using a unique twin cylinder design, the twin cylinders work together to supply your home with softened water 24/7. The TwinTec Cobalt is non-electric and only regenerates when necessary, saving energy and lowering running costs. Suitable for homes with 1-3 bathrooms.

*The lower water efficiency percentage means the water softener is more efficient. Water efficiency comparison is calculated using TwinTec Cobalt and Kinetico specification/performance data taken from Kinetico manufacturers instructions as of 25th September 2019.

**Salt efficiency comparison is calculated using the TwinTec Cobalt and Kinetico specification/performance data taken from Kinetico manufacturers instructions as of 25th September 2019.
